**Accounting for Decision Makers: Financial**

3 cr  with Constance Rodriguez

spaces avail  10     Intro/Non-Liberal

**Online Study Group**

This study covers the fundamentals of financial accounting from the perspective of a user, it is the first half of a two part study. Accounting for Decision Makers emphasizes the relevance of accounting information to managers and includes analysis of financial statements, inventory methods and financial ratios. Students are expected to evaluate and offer solutions to business problems. It is appropriate for those pursuing non-accounting degrees, managers in small or large companies or those planning to start their own small business. It does not meet the prerequisites for further accounting study. Students will use the textbook publisher's assignment system as the primary tool for assignment completion. They must purchase the textbook bundle that includes access to the system.

This study will focus on the history and development of the animal protection movement. The student will study the profound moral, philosophical, and legal questions provoked by the issues the animal rights movement has created. This study will also focus on how the movement reshaped itself as it has evolved within the broader social context of the shift of the United States from an industrial to a post industrial society. Few Americans today perceive either the companionship or the consumption of animals in the same manner as did earlier generations. Moreover, powerful and lingering bonds connect the seemingly disparate American Society for the Prevention of Cruelty to Animals of the nineteenth century and the People for the Ethical Treatment of Animals of today. For the Prevention of Cruelty tells an intriguing and important story that reveals society’s often changing relationship with animals through the lens of those who struggled to shepherd the public toward a greater compassion.

This is an Advanced level study of Digital Photography with an emphasis on the basic history and principles of photography, how to use your digital camera and what constitutes a “good” photograph. Students should acquire a camera with manual settings to use for this study. Students who have little or no previous background in photography are welcome to register for this study. However, the academic expectations for this study will be at the advanced level. For example, appropriate research writing skills will be expected as well as a recognizable awareness of how to demonstrate college level learning to the mentor. Please see the note above about the need to join the private Facebook study group. Upon registering, students should contact the instructor to get started with this study.

Among the recent developments in the field of human resources management (HRM) is the increasing use of information technology. As a result of both the expansion of HR activities and mandates from federal and state statutes, record keeping is becoming an essential part of human resource practitioners’ responsibilities. Students should be acquainted with the “best practices” and creative ideas in human resource information systems, and familiar with some cutting-edge HR software packages. Topics covered in the study include database concepts and applications in HRIS, the system development life cycle, and effective approaches to the measurement of human capital and the impact of people on organization processes, for example, HR programs such as recruiting. This study can be offered at the introductory or advanced level. This is offered jointly with Dr. Angela TitiAmayah.

This is an intensive 4-credit study of the basic principles and procedures for gathering, recording, summarizing and interpreting accounting data. It examines generally accepted accounting principles for measurement and reporting of financial information in a balance sheet and income statement. Topics include financial assets including cash, short-term investments and accounts receivables; inventories and the cost of goods sold; and plant assets and depreciation including acquisition of assets, disposal of plant and equipment, intangible assets and natural resources. Liabilities common to most businesses also are considered. Note: Participation in this study requires the previous use and basic knowledge of spreadsheet software. Use of an online homework system requires that you have daily access to the Internet as assignments are completed using the CengageNow online learning resource. The student must purchase a bundle that includes the textbook and online system access key. Moodle will be used as a base for student discussion, assignment information and submission of casework.

** Leadership & Professional Development 6 cr with MD Haque **

Recent studies show that today's best leaders are those whose inner compass guide their daily actions and enable them to earn the trust of their subordinates, peers, and shareholders. The purpose of Leadership and Professional Development study (LPD) is to enable students to develop themselves as leaders of organizations and to embark on paths of personal leadership development, professional development and identity formation. LPD takes the view that to succeed in professional life we need to develop our ability to understand and direct our internal environment -- our mindsets, emotions and motivations. Some of the most crucial skills in life have to do with how well we can manage this internal environment under ever-changing external circumstances. LPD is a catalyst for self-reflection. It is designed to help each student understand his/her leadership style; develop a personal philosophy of leadership, and an awareness of one's own. During this study the students will explore deeply the qualities of successful leaders and uncover the unique characteristics that comprise their personal leadership that will yield tangible improvements in their mastery over their inner environment. Lectures are supplemented by exercises involving introspection, self-evaluation, and the application of specific Personal Leadership techniques by students in their own lives. The study is appropriate for students who either hold leadership positions or are aspiring leaders from all backgrounds, and industries. This is offered jointly with Angela TitiAmayah.

Students at Empire State College spend a considerable amount of time independently acquiring information and learning new skills. With each new study, a student may need to plan, implement, and demonstrate learning to successfully earn college credit. This process is often called “self-directed learning.” This study is designed to explore, analyze, and apply skills and strategies needed to successfully complete self-directed learning experiences. The first half of the study will focus on self-reflection and behaviors typically associated with self-directed learners. The second half of the study will focus on communication and critical analysis strategies/skills necessary to learn from multiple forms of sources (print, visual, and electronic) and mentor meetings. The ultimate goal of this study is to assist students with a transition to a study environment at Empire State College in which they have the primary responsibility for their learning. The majority of this study will be completed with an online course space. Two face-to-face meetings will be required. At the initial face-to-face meeting, an orientation to the online study space will be provided.

This study is designed to support adult students who have not had a mathematics course for some time or who are anxious about studying math. Students will learn new approaches to the study of math and will gain skill and confidence as they strengthen their mathematical foundations in this small group setting. Frequent group study sessions will provide instruction and opportunities for discussion and questions. Students have access to a website where they can practice new math skills, complete homework assignments and take graded quizzes and tests. Free math tutoring sessions are available to support students. These may be accessed either online, by phone, or in person at the Genesee Valley Center. The math topics in this study include operations on integers and whole numbers, decimals, percents, geometry, graphing, and problem solving. The class will also be introduced to equation solving, probability, and statistics. Students with questions or concerns about the study, course content or assignments should contact the instructor at Anne.McDonough@esc.edu.

St. Thomas Episcopal Church, 2000 Highland Ave, Rochester, NY 14618  Great Hall  Saturdays  11:15 am - 12:45 pm  3/14, 3/21,
The student will work with tutor Elizabeth Clark in this study that is an introduction to Dance, an introduction to the Arts and
satisfies the SUNY general education requirement in the Arts. The study will consist of learning about the theory, art and
underlying movement principles of dance through the following learning activities: Attending 13 weekly classes at Elizabeth
Clark's studio. Keeping a journal that will consist of written notes from class, observations on any of the learning activities, and
sketches/drawings of central learning issues. Reading, taking notes from and writing a final 12 page report on ideokinetic and
imaging techniques as they relate to dance, based on one main outside reading source. Attendance at studio class is
mandatory. The goal of this study is multi-fold: To develop a theoretical, artistic and kinesiological familiarity with dance. To
see that dance or movement is a central part of one's self-development. To develop an overall sense of health and wellness for
both body and mind by means of proper warm-up and cool down techniques. Exploring dance as an artistic medium that is
predicated on ideas of movement. Contact Elizabeth Clark at:  585-442-5988 to discuss.
